

Printed Circuit Board Assembly Specialists based in Kent in the UK

With a highly skilled and dedicated workforce, you are assured the very best quality and benefit from the vast experience that Cephos has attained over the last 35 years in Contract Electronic Manufacturing.

Cephos is fully equipped to handle any and all types of printed circuit board assembly, in any volume from prototype to high volume production runs.

- ➔ Prototype and Rapid PCB assembly - our design capabilities and electronic expertise enables Cephos to offer a rapid turnaround prototyping service which includes SMT, conventional and mixed technology PCB assemblies
- ➔ Electronic assembly for SMT, Through Hole and Mixed Technology PCB assemblies
- ➔ Cephos has extensive experience in the assembly of surface mount components on all types of printed circuit boards, using the most modern state-of-the-art pick and place PCB assembly equipment.
- ➔ With our dedicated team of PCB assemblers, Cephos is able to undertake even the most challenging Through Hole PCB assembly work with precision, working to the highest standards achievable in the industry. Our customers are assured the very highest quality of workmanship.

The Cephos Invitation

.....find out how you can use Cephos as an extension of your own Company.

We can act as your manufacturing partner and eliminate the negative aspects in the ordering and supply of your printed circuit boards, components and assembled units.

Our technology and carefully implemented flexible delivery arrangements are in place to serve one purpose - to ensure that the procurement of your product from design through prototype to production quantities is as trouble free as possible.

If you have a particular problem or requirement, please talk to us. There can often be a number of possible solutions to a particular situation if the flexibility and willingness to co-operate is in place

One Stop Shop

- **Conventional PCB population**
- **Surface mount PCB population**
- **PCB Design and manufacture**
- **Rack and panel wiring**
- **Cable forms**
- **Electro-mechanical assembly**
- **Component supply and kitting**

End Users

- Defence Agencies
- The Metropolitan Police
- Network Rail
- Aviation Industry
- Regional Electricity Boards
- Process Control Industry
- Security and Alarm Industry
- Computer and IT Companies
- Telecommunications

PCB Manufacture

- Single sided
- Plated through hole
- Multilayer
- Flexible
- Bare board testing
- FR4 and aluminium substrate
- Small and large volume
- Reverse engineering
- Layout design

Complete Electronic Component Kitting Service

Our buying power ensures that we obtain end column prices for production runs and prototypes, these savings are then passed on to our customers

Cephos only purchase franchise products to your specification, use our worldwide sourcing facilities for all of your component requirements

Cephos can schedule deliveries to suit your specific requirements, and with each kit link your part numbers or component references to manufacturers part numbers, saving you time and money.

Contact Cephos for a prompt no-obligation competitive quote

C-BT53 Relay

REPLACES OBSOLETE BT53 TYPES:

- Omron G5A-234P series
- Fujitsu FBR46 series
- Panasonic DF2 series
